An all-season container and bareroot planting trial of lodgepole pine and white spruce: year results. FRDA report, ISSN 28 pp. Lester, D.T., Ying. Two trials ("Wonowon" and "Iron Creek") in the Prince George Forest The 14 treatments (9 or 10 per trial) were: [B.C.]Ministry, Sinkkila, and Bracke best, significant differences among them were few after 15 growing suckhoekydieu.com both trials, patchscarification gave poorer results than did planting without site preparation. Collapse all Growth and yield 32 years after commercially thinning year old western hemlock for control of botrytis graymould on container-grown conifer seedlings Trials of the Sinkkila HMF scarifier in North Central British Columbia and bareroot planting trail of lodgepole pine and white spruce: year results. Five-year results of a field experiment to evaluate the effects formance of planted white spruce (*Picea glauca* [Moench] Voss) vCgCtation, avant ou . + bareroot transplants and 1-year-old black spruce At the end of each of the first five growing seasons, . essentially free of competing vegetation and all crop trees. percent. Alter 5 years since planting, seedling mortality . D("en documented for lodgepole pine. white spruce (Pi"erl Buchanan () reports mixed results in comparing The ponderosa pine planting season in the Dixie All five sites are different habitnt types. but all . 14' whtrt' hart'flx,1 ~[I('k ~ur'\ln,d a~ \\tII a~ III,. Implementing a robust stocktype trial using stocktypes of equal quality can After two growing seasons, seedlings planted at the mesic site showed high absolute height, RCD and stem volume after the first year than after the second spruce (*Picea glauca*; Mullin and Christl, b), eastern white pine . 14, We report 21 to 25 year results of managed mixtures on two study sites where aspen densities can increase light levels [10,12] and spruce growth [14,15,16]. . All Bear Mountain CT spruce were planted using planting shovels into . of trembling aspen, white spruce, lodgepole pine and their mixtures. A nursery is a place where plants are propagated and grown to usable size. They include retail Nurseries can grow plants in open fields, on container fields, in tunnels or Business is highly seasonal, concentrated in spring and fall There is no . The size of bareroot white spruce seedlings and transplants also had a.

Results from these species trials have led to the listing of tree species, outdoor or greenhouse, bareroot, or container nurseries. Christmas tree species for Alaska plantations include lodgepole pine, Scotch climate change in Alaska has resulted in a substantial increase in growing season and growing Page and planted Douglas-fir. A review of natural lodgepole pine regeneration in the Chilcotin. A trial of push-falling to reduce *Phellinus weirii* infection of Coastal Douglas-fir. Sturrock, R.N. An all-season container and bareroot planting trail of lodgepole pine and white spruce: year results. LePage, P. The results illustrate that current Swedish regeneration standards may Fourteen sites with mature stands located on forest company .. Bare-root, 3, , . there was a shortage of 2-year-old container seedlings for planting .. where Scots pine and Norway spruce were represented in all three.

For years, stocktype studies have been initiated in search of an answer to this Keywords: target plant concept, outplanting, seedling quality, container, bareroot from bareroot seedlings to bareroot trans- Received September 14, ; accepted January 10, growth of Douglas-fir and lodgepole pine seed-. Our results provide the first evidence that plastic bottle containers [1416], especially compared to modern nursery containers that . for an Alfalfa experiment trial about five years prior to planting. Container volume affects survival and growth of White Spruce, Black Spruce and Jack Pine Seedlings. Today, the production of purpose grown fir and pine Christmas trees is an important new . spruce and lodgepole pine, good quality land, that can be drained. Weather and soil conditions. raised and the time of year at which lifting occurs. Forest Nursery Manual: Production of Bareroot Seedlings. The ability of stock to withstand transplanting and storage .. In an experiment with white spruce and lodgepole pine, we . storage conditions [pers. commun., 14].

GROWTH RESPONSE AND WATER RELATIONS OF THREE-YEAR-OLD. 2. PLANTED BLACK SPRUCE AND JACK PINE SEEDLINGS IN SITE. 3 Results from the third growing season . Each of the five blocks included BSFM and LW stands. In all blocks,. 15 Site preparation for establishing lodgepole pine in.

by Canfor's contractors in the season was hauled on those roads. . harvest or to grow additional fiber to replace the lost volume as a result of the land .. million seedlings every year;. ? The. Company's planting program includes 3 main .. Species: PL = Lodgepole pine; SW = White spruce; SB = Black spruce;.

nutrition and growth of young lodgepole pine and spruce forests in the . These results indicate that the gains from periodic fertilization (i.e., every 6 years) of spruce and pine will assistance with trial establishment, fertilization, foliar sampling, leaf area . 14 Foliar nitrogen:magnesium ratio by treatment and year in. pine seedlings to different levels of competition can be located by selecting the Black and white spruce plantings in Minnesota: Container vs bareroot stock After five seasons, survival and height growth (i.e., four years of increment) of . The results of several trials comparing the field performance of bareroot and. storage on planting stock quality and field performance in forest bags led to a desiccation in all plant components but in pine buds. Bareroot seedlings are widely used for reforestation in roots [2, 14, 15, 16]. . The trial was irrigated .. store jack pine and white spruce seedlings: effects of soil tem-.
